EXPERIENCE

General Assembly, Boston

Oct 2017 - January 2018

- Demonstrated a strong understanding of modern web development through 12 week 600+ hour project based course
- Built and deployed four full stack single page web applications to spec in both individual and group settings. Projects were made using modern front end languages and RESTFUL APIs.

PROJECTS

babaBlog — *full-stack web app*

My capstone project for General Assembly. A blog for users to post their thoughts. Users can sign in, make a post, and comment on other's posts. Made with Ember.js and Rails

Paul's Song App — *full-stack web app*

A full-stack web app to keep track of liked songs. Made with Javascript, HTML, CSS and Ruby on Rails. Users can sign in and access my deployed API to favorite and unfavorite songs.

Bucket List — *full-stack web app*

Bucket List is a web app for users to keep track of goals and they want to achieve in their life. Made using Javascript, HTML, CSS, Express and Mongo. This project was made in a group setting with two other developers, teaching me the importance of SCRUM and team based development.

Tic Tac Toe — *front-end web game*

A front end web app of the classic tic-tac-toe game. Made with Javascript, CSS3, and HTML5. Includes sign in/sign up functionality and interacts with an API to record user games

Skills

- Javascript, JQuery, AJAX
- HTML5, CSS3, Bootstrap, Handlebars
- Ruby on Rails
- Git, Gh-pages, Heroku

Education

Seattle Central College

Past Work Experience
